

SC CORTEN

STACK

STACK

Create your own wood storage with our STACK. Combine and easily place the various components. The honeycomb-inspired design fits perfectly in any garden. Robust and stylish!

FEATURES

The warm appearance of CorTen steel blends perfectly with the stacked wood. Beautiful for outdoor spaces and also very functional. The open side allows the wood to dry. With the modular system, you can determine the size and shape yourself. The coupling piece ensures that the boxes can be easily and securely stacked on top of each other.

The STACK system made of CorTen steel gradually turns orange-brown. CorTen steel is a metal alloy consisting of iron, to which copper, phosphorus, silicon, nickel, and chromium have been added. When exposed to the outdoors, the material develops a protective rust layer. This natural rust layer forms protection against further corrosion.

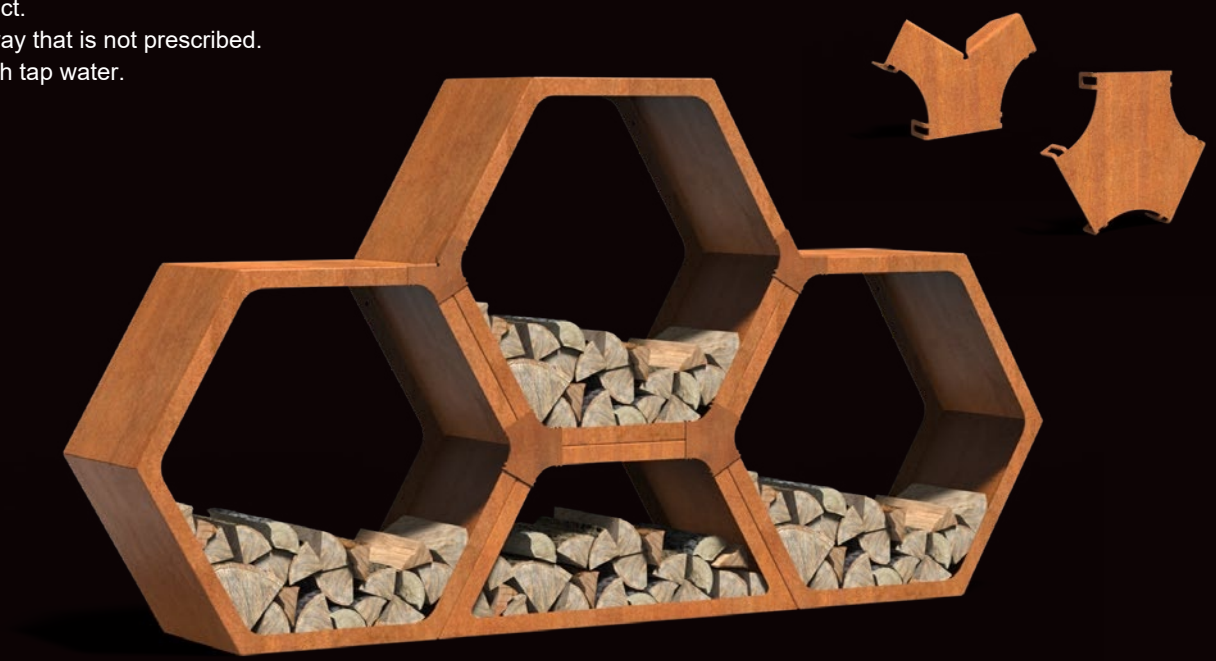

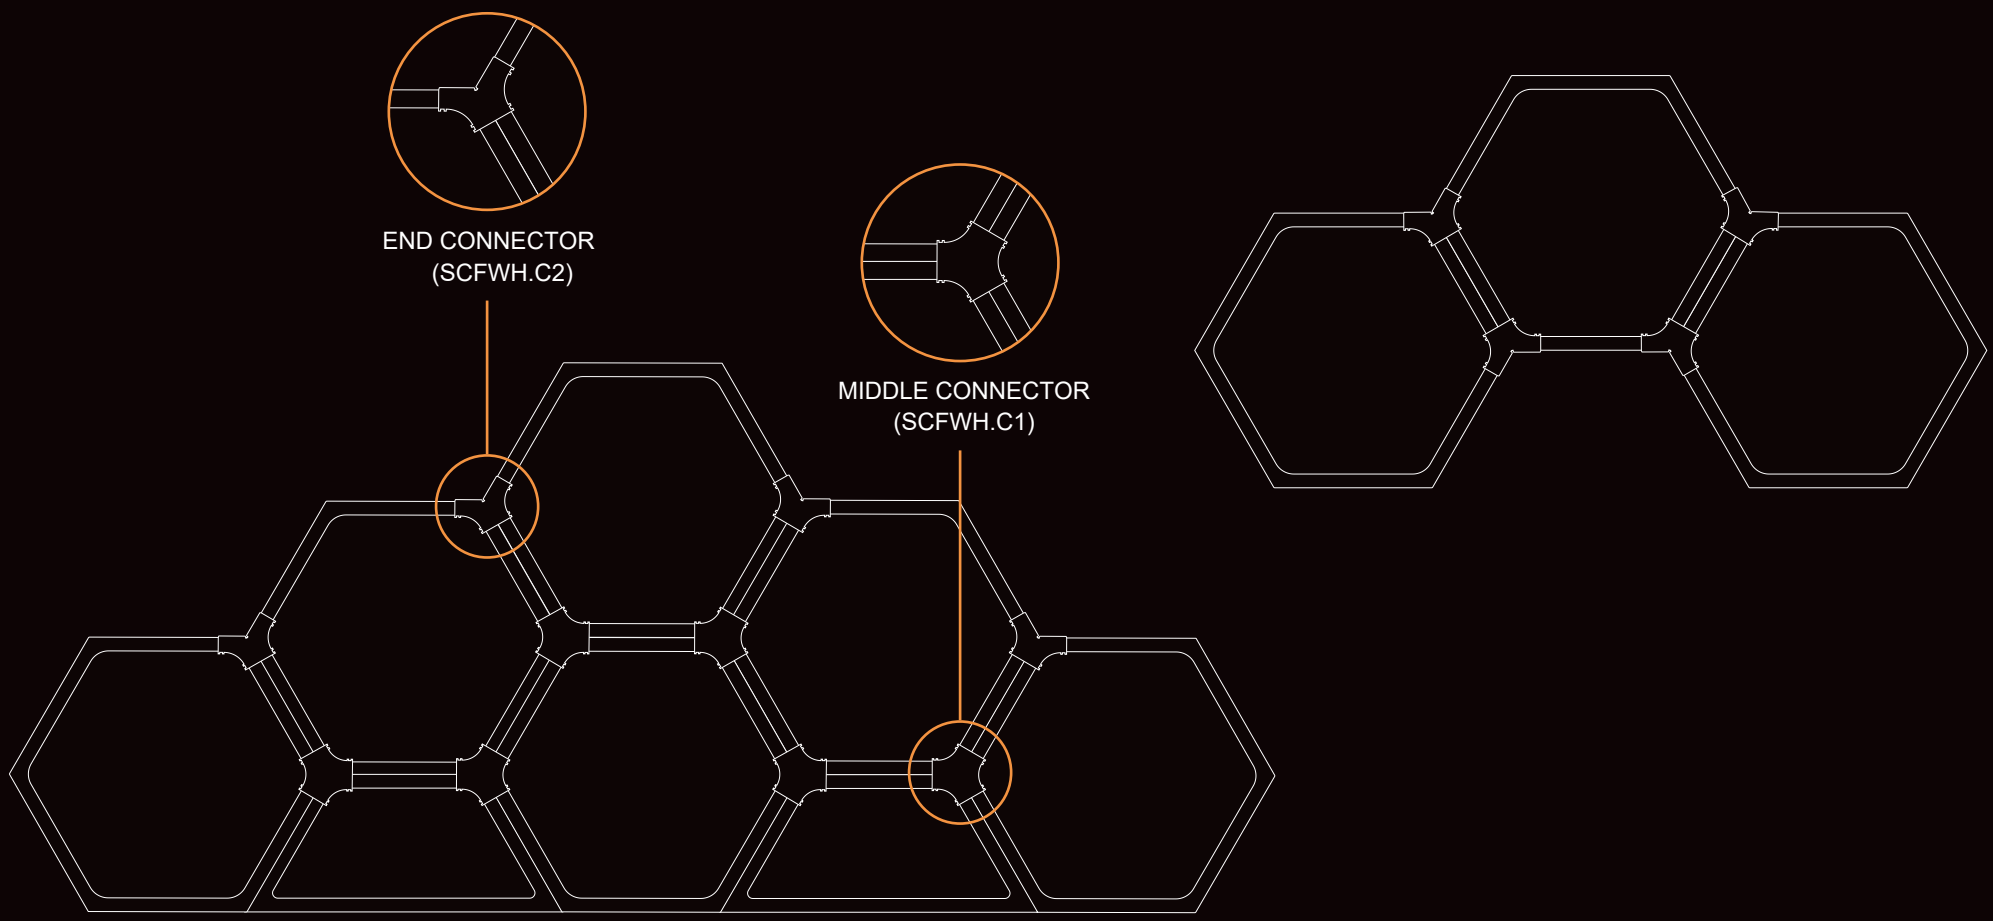

SPECIFICATIONS

- 5-year warranty.
- Connectors not included.
- We recommend always coupling the components for increased stability.
- Holes for wall mounting (excluding bolts and nuts).

KEY POINTS TO NOTE

- Products should be unpacked immediately upon receipt to prevent any moisture between the packaging and the product from being trapped, as this can cause irregular stains.
- Products are delivered unrusted. The rusting process takes about 4-5 months, depending on weather conditions.
- We do not recommend using corten steel within 2 km of a coastline.
- During the rusting process, rust water may come off the product.
- The warranty is void if you drill or grind into the material in a way that is not prescribed.
- Clean annually by spraying off any debris from the product with tap water.

Note! Order connectors for the front and back.
