

OROS

OROS

Bring your garden to life with the OROS. This water feature creates a unique and cozy atmosphere, with water gently trickling over the edge. With its rounded shapes, the design not only looks beautiful and elegant but also brings peace to the garden. With the light in the water table, you can also enjoy a beautiful decoration in your garden in the evening.

Material corten steel

The color of corten steel is orange-brown, giving the OROS a warm and powerful appearance. It forms through a natural rust layer. Another name for corten steel is weathering steel: weather conditions positively affect the material.

Corten steel is a metal alloy consisting of iron, to which copper, phosphorus, silicon, nickel, and chromium are added. When exposed to the outdoors, the material is covered with a protective rust layer. This natural rust layer provides protection against further corrosion. As a result, corten steel products have a long lifespan.

SPECIFICATIONS

- 5-year warranty (pump 2 years – LED lighting 1 year).
- Includes pump, fountain, and LED lighting.
- The BAYOU is wear-resistant, weather-resistant, and durable.
- Products are delivered unrusted. The rusting process of corten steel takes about **4-5** months, depending on weather conditions.

IMPORTANT POINTS

- Products must be unpacked immediately upon receipt to prevent any moisture between the packaging and the product from being trapped. This can cause irregular rust spots.
- We do not recommend corten steel within a 2 km radius of a coastline.
- During the rusting process, rust water may come off the product.
- The warranty is void if drilling or grinding is done in a non-prescribed manner.
